

PIS/2020-21/008

Dear Nurturer,

09-09-2020

With smart technology now available in everyone's pocket and augmenting in the usage of android mobile phones, Intelli School will be collaborating with an application named MyClassboard which has a custom Android Mobile App and custom Ios App for Teachers, Parents, and Students for easy access to information from School. Our endeavor is to regularly update and connect our Parents, Students and teachers with timely information.

MyClassboard Parent App with its varied features is something every student looks for. Here are the salient features of the app.

- Daily Diary
- Assignments
- Time-table
- Photo Gallery
- Event Calendar
- School Announcements
- Online Assessments

Daily Diary: Unlike the old days where students were given School homework mentioned in a book often referred as the diary, the daily diary module of this app updates the school homework for every class and grade. In any case, if the student is absent to the School and wants to know about the daily homework given, he/she can simply use this module to get the required information. Even Parents can access this daily diary component to check for the homework assignment to be worked on by the children.

Assignments: Any Assignments or project work given by the teacher/Co-learner is directly uploaded in this module. Parents can just login using their unique id to get the information of assignments given to them. Not just the Parents but the Students too can access this module to check the assignment work given to them.

Timetable: This feature of our App helps Students & Parents to get daily timetable assigned to every class. Students can go through the periods and teachers allocated for that particular day. Timetable schedule is available on a daily or weekly basis. The daily timetable

schedule displays the schedule for every single day whereas the weekly schedule displays the timetable for the entire week.

Photo Gallery: As the name suggests, this module carries the photos of any events or occasions organized in the School. Regular events held in School will be posted. Special events like Annual Day function, Sports day function or any other special occasion, photos pertaining to those special days are also stored in this module.

Event Calendar: This module displays the details of those particular events or occasions for that academic year.

School Announcements : Regular announcements of various important Circulars & activities in School will be posted on a daily basis.

Online Assessments: Online Assessment is conducting a test Online to measure the knowledge of the students on a given topic / subject. Online Assessments are used to take an assessment. Questionnaires and online ability tests can be completed at home or in a controlled environment with the help of this App.

The mobile app benefits the Parents & Students to get all the information related to the School, classrooms and individual information with relative ease. Any Student absent to the School can no longer have to be worried about getting the information and activities carried out for that day. No need to be stressed out about how to get the information, whom to call or approach and where to seek. This App provides the students with all the adequate information perhaps needed by the students even during their absence.

We will be sending the Parent Login details by SMS & Email to both Parents i.e., to the Mother & Father of our students and request you to install the App in your respective Mobiles. Also, the Students will be given their Login Information to check their work given by their Teachers regularly.

The same username & password can be used for login through the Web Browser from any Computer as well.

For any details or challenges faced during the installation of this App you may call the Nos 9100666395 / 8790958469

Thank you

Team Intelli
