Microsoft teams on iPads and Tablets

Hardware requirements for Teams on mobile devices

You can use Teams on these mobile platforms:

- Android: Compatible with Android phones and tablets. Android OS version 5 and above. When a new major version of Android is released, the new version and the previous three versions are officially supported.
- iOS: Compatible with iPhone, iPad, and iPod touch.

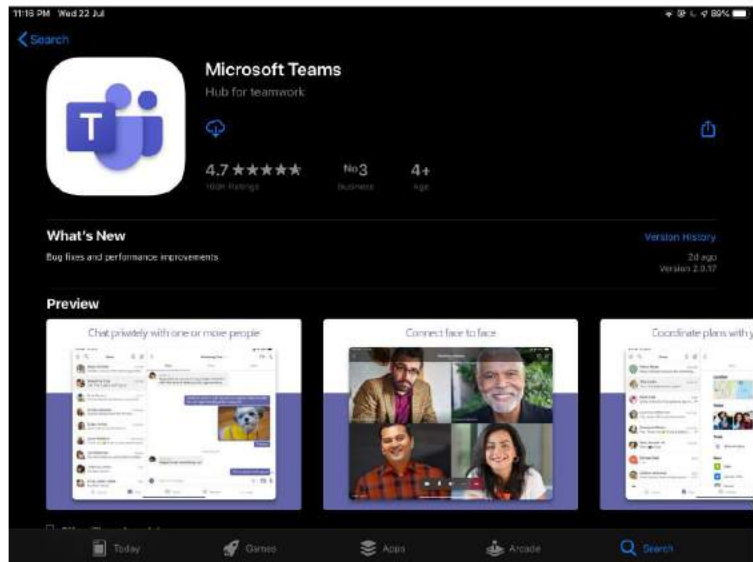

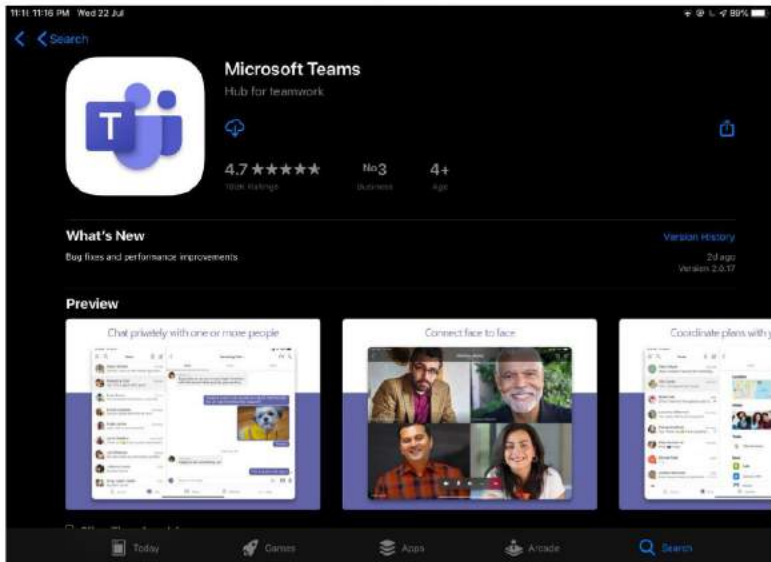

Support is limited to the two most recent major versions of iOS. When a new major version of iOS is released, the new version of iOS and the previous version are officially supported. The optional **Blur my background** video effect on iOS requires an operating system of iOS 12 or later and is compatible with the following devices: iPhone 7 or later, iPad 2018 (6th generation) or later, and the iPod touch 2019 (7th generation).

For the best experience with Teams, use the latest version of iOS and Android.

Go to Play store or Appstore on you tablet or iPad and search for Microsoft teams App

Google Play

Open the app once it downloads

Look for this icon in your home screen and open it
