

*Dear Nurturer,*

Virtual Learning or Home-based Learning has come a long way since alternative means were moved away from traditional learning. Learning through Online methods has indeed taken an imperative position. In short, the learning ecosystem should be resilient and scalable irrespective of the uncertainties and continually shifting paradigms. Intelli has come up with a unique Learning to Teaching Approach giving a wider opportunity to i-generation by integrating best learning practices that shall be independent of online and offline environments.

Here, we launch our much-awaited

## TAIL PROGRAM

A sound thought of program for our Learning Community, a radical shift yet the need of the hour. Transformative – Adaptive – Inspiring – Looping – We introduce a framework to make our i-kids make the most of their experience.

**Transformative:** At Intelli, we do not just believe in change but believe in a complete transformation in the way we THINK, ACT and REFLECT about the whole learning process.

**Adaptive :** Every student has specific learning abilities therefore, to meet such needs, we step forward and make it happen through personalized approaches. Through advanced teaching strategies, our Colearners transform traditional to broad-based learning by adding precision to it.

**Inspiring :** We blend inclusive Learning approaches, which enable us to tailor inspiring activity-based sessions to maximize their impact on our i-kids. In other words, we are trying to raise the bar by providing the more significant world lessons as cases of learning. This will have a more profound impact on the child and create life-changing values and immeasurable skills.

**Looping :** Learning shall lead to activity or innovation, thus producing more learning and that's how an infinite loop of progress can be achieved among the children.

Apart from academic Learning Approaches, students can reap benefits from developing social and emotional skills through group strategies in the academic session.

It will allow students to know one another well by facilitating the social construction of knowledge.

Students at Intelli will be able to strengthen emotional and intellectual skills by involving themselves in critical thinking and risk-taking.

We are delighted to invite your friends and family members interested to have an insight into Intelli's approach towards Learning and Teaching Methodologies.

Signing for a TAIL program will give you a detailed Comprehensive Orientation and Academic outcome of your Child.

You can call us on this number **95504 15555** or email us at **parents@intellischool.in** if you want to fix an appointment for the program.

Team Intelli.
